

CENTRAL UNION CHURCH.

Proposed New Edifice—Extracts from the Building Committee's Report.

At the business meeting of Central Union Church on Wednesday evening, Messrs. C. M. Cooke and Alex. Young of the Building Committee presented a lengthy report of which we give below the essential portions. After a full amount of the steps by which the conclusions of the committee were arrived at, the report proceeds as follows:

The depth of our lot from Beretania street to the centre is 173½ feet, the ground plan of the proposed church has been cut out of paste-board on the same scale and pasted on the survey of our lot to show how the building will fit, and the position we propose it would occupy on the land. Should the church be built of wood in accordance with sizes given in those plans, there will remain only seven and a half feet in the rear, which is not sufficient width for a driveway, and should we decide to build of brick or stone a part of this space will be taken by the increased thickness of walls, such being the case, we would suggest that no horses and carriages be allowed on the grounds, and that the lot be well laid out with concrete walks, lawns, gardens, etc., and that the surroundings be made as beautiful as possible. In view of this year committee have made application to the Trustees of the Oahu College what they would charge to allow horses and carriages to remain in the Preparatory School grounds during all the services of this church. We are informed that an arrangement could be consummated at the rate of \$200 per annum, this would include keeping the part so used in order, and lighting the backyard.

The following are the dimensions of the various apartments for the proposed building:

Nave—about sixty-eight feet long by twenty feet wide, being entered from Beretania street by nine steps, through three doorways each six feet wide; there will be stairways at each end leading to gallery. The two doorways to the auditorium are each six feet wide.

Auditorium is proposed to be sixty-eight feet wide by sixty-eight feet and about forty-four feet high with groined ceiling. The floor has an incline of five feet towards the pulpit, over the vestibule will be a gallery projecting into the auditorium as far as the first row of seats. It is estimated that the auditorium will seat 514 adults, and the gallery 194, making a total of 708, this is allowing twenty-two and a half inches for each person, "pew-makers figure more often nineteen to twenty inches." Our present auditorium is 57x57½, with a gallery of 41½x50½, together seating 450 comfortably, when five occupy a seat 500 persons can find room, with the same-crowding the new auditorium will seat about 740. The pews are arranged in semi-circular form, there will be five aisles, the centre one only about two-thirds of the way. Upon either side of the choir loft and leading to the main hall of the Sunday School department are two entrances, these being on the lowest level of the floor will be approached by those who wish to avoid ascending the front steps, as well as connecting the auditorium with all other parts of the church. In the matter of ventilation Mr. Nordwell expects to meet all that is required. When the committee requested that both the auditorium and Sunday School room be so ventilated as not to depend on the doors and windows, thus avoiding draughts with the openings of these apartments and the ceiling or ventilators over head of both, this end can doubtless be accomplished.

A floor left as planned is 18 feet deep and 26 feet wide, by 24 feet high, with dome-shaped ceiling towards auditorium in centre of arch. It has been suggested by choir members that the depth be increased two feet by bringing forward the floor into the auditorium, by so doing this apartment will be cooler and less of the appearance of the choir being "trapped in," our present choir loft is 20½ x 19½ feet deep.

Sabbath school, prayer meeting, and social room, is proposed to be 64 x 64 x 25 feet high and 9½ feet height under the gallery (12 feet wide) around two sides and rear. The desk of the superintendent or leader can be seen from every part of this room, and is well arranged. On account of our warm climate, it has been thought best to leave out the sliding doors and slat curtains under the side galleries, but to retain those under the rear gallery, that they may be closed when the room is used for prayer meeting, and thus decrease the heat of each a large room. The ceiling is on the same plan as that of the auditorium, the floor level, and floors of the gallery on a slope just stepped. Our present Sunday school rooms have an area of 2,872 square feet against 4,100 square feet in our proposed room, not including gallery and primary room, which would add 2,700 square feet, or a whole area of 6,800 square feet, about two-thirds more space than we now have.

Primary department room measures 20 x 22½ feet, to be entered from the upstairs hall, by large sliding door-way, this room corresponding with the pastor's study (24 x 21) on the Richards street side. It has been thought by some that the room is not of sufficient size for our primary school, but it is suggested that only the youngest scholars be kept for this part of our school and with the two triangular rooms each side that 75 to 90 scholars can be well accommodated.

The ladies' parlor is 18½ x 21½, entered from the down stair hall, and to be connected with the hall by large sliding doors, thus increasing the capacity of the room 6 feet, when found necessary to do so. This room is intended for ladies only, and not a social room as our present parlors are. It is thought by some ladies that this room will be too small, but it is the opinion of the committee, that the size will be found ample.

The kitchen 19 x 15½, located on the opposite side of building from ladies' parlor, will be found convenient for socials, etc., with sink, tables, china closets, and a "pass window" which opens into the main hall.

On the lavatories, hallways, drinking fountain, library, windows, doors, external appearance, etc., these plans show more clearly than can be described in this report.

The committee then give estimates of the probable cost of the proposed new building, from which it appears that it

constructed of wood it will cost about \$27,000, and if of brick, about 35 per cent. more than that amount. The report of the committee was accepted, so far as relates to the general plan, leaving the question of material to be decided hereafter. Any one desirous of seeing the plans can do so by calling at the vestry of Central Union Church.

Future Advertising.

The advertising mediums of the past have all been insignificant compared to what may be expected in the future. If the following report taken from one of our exchanges be true, it gives an indication of what certain kinds of advertising may become, and that world-wide circulation on an immense scale will be the object sought to be obtained. The extract to which we refer reads as follows: "The Germans are constructing a huge floating exhibition palace at a cost of £250,000, in which to give ocular demonstration of the superiority of German manufactures to the sceptical amongst the distant nations of the earth. This vessel will be called the Kaiser Wilhelm, and will be 564 feet long, 66 feet wide, and 46 feet deep. She will be, it is said, the most magnificently fitted ship afloat. The exhibition will be made to yield a profit of £100,000 annually from the income derived from rented space, and from the sales of goods. It is expected that the ship will sail from Hamburg in the spring of 1890, but her first destination is not known."

Back in the last century Alexander Smith, afterward known as John Adams, one of the ringleaders in the famous mutiny on the ship Bounty in 1789, saved a midshipman from drowning. The latter put £100 in bank to await Smith's call. It remained until it had risen to the sum of £36,000. Now three grandsons of the mutineer, living on Norfolk and Pitcairn Islands, have discovered their identity, and one of them has succeeded in establishing his title to the great accumulation.

The contest in Mont Gilead, Ohio, between father and son for the office of Mayor, ended in the election of the son.

MURRAY & LANMAN'S
FLORIDA WATER
The Universal Perfume

For the Toilet, the Bath and the Handkerchief.

In view of the attempts made recently by some unscrupulous dealers, to fast upon the public a worthless imitation, bearing the general outward appearance of the genuine, we call attention to the distinguishing marks of the genuine MURRAY & LANMAN FLORIDA WATER.

Each bottle of the genuine article bears on its neck the Trade Mark, which appears alongside this notice; and on each leaf of the pamphlet, which is wrapped around it, appears in faint water mark letters the words LANMAN & KEMP, NEW YORK.

If either be lacking reject the article as spurious.

CASTLE & COOKE

Would respectfully call renewed attention to their

LARGE STOCK OF STANDARD GOODS

Especially selected to meet the demands of

Planters, Sugar Mills and Mechanics!

Recent large arrivals enable us to fill orders with increased satisfaction, and unremitting attention to the wants of our patrons and replenishing stock from San Francisco, New York and England, to disappoint our customers but very rarely. To catalogue our varied stock or properly describe it would take an entire issue of the GAZETTE, supplement and all in fine print. Call and make your wants known. We specially would call attention to new supplies as follows:

ASBESTOS FELT MIXTURE

The STANDARD pipe and boiler covering; and Hair Felt.

Pearl, Palace and Vulcan Kerosene Oils!

A large stock at bottom prices.

FRANKLYN STOVE COAL in quantities to suit.

Increased stocks and lines of Shelf Goods and Mechanics Tools,

Files, Saws, Planes, Etc.

A large line of AGATE WARE. A splendid "COOKING CROCK," a new invention which should be in every nice kitchen.

For the rest call and see for yourself!
